Curtis Industries Introduces New Terminal Block Selection Guide

MILWAUKEE, WI - October 1, 2008 - Curtis Industries has published their new 6-Page Terminal Block Selection Guide. This Guide assists the customer in selecting, from a very broad offering, the appropriate block for their specific application.

The Guide includes all Terminal Blocks and Custom Capabilities making up a comprehensive product offering for use in general as well as unique Terminal Block applications.

Curtis Industries is a quality manufacturer of Terminal Blocks, EMI Filters and Liquid Level Controls. Curtis' products are manufactured under a rigorous component qualification program and inspected with the latest technology in automated testing of every product prior to shipping. Curtis offers Barrier type, DIN Rail and P.C. Board Mount (Euro) styles. Custom terminal blocks for design specific applications are also available.
